

WHAT IS DESTINATION PROSTHETICS?

Destination Prosthetics is a special program designed for amputees like you who want to achieve mobility, but are unable to receive the rehabilitation care needed in your own community or from your own prosthetist.

At Destination Prosthetics in the Prosthetic Care Facility of Virginia, you will receive intensive one-on-one treatment with no interruptions. When you come to us for assistance, we will review your limb-loss history, fit you with the correct socket and components, analyze your ability to walk in our Gait Training Lab, and educate you in the care and use of the components. We also offer adjustments as needed.

With a call to (703) 723-2803 or email to mehattingh@nmlink.com, you can find out if you qualify for this unique program and assistance with travel expenses.

To be considered for Destination Prosthetics, you must live more than 100 miles from Leesburg, Va.

HOW DO I QUALIFY FOR DESTINATION PROSTHETICS?

Once you contact us, you will do a phone consultation with John Hattingh, CP, LPO, CPO(SA). He will ask you for all your health and amputation information and after review, he will establish a course of treatment for you. At this point, you will be contacted by Michele Hattingh, Administrator, for all the necessary documentation needed for us to begin treatment.

This includes:

- Complete patient registration form
- Copies of all insurance cards
- Physician's prescription

Michele will work with your insurance provider to establish what your benefits are and if you require pre-authorization. She will also check for your Out-of-State and Out-of-Network insurance benefits. This may also require a copy of your physician's notes and/or a letter of medical necessity. We will work with you and/or the physician's office for these.

TRAVEL AND ACCOMMODATIONS

When all the necessary paperwork is in place and your physician and insurance is on board – Michele will arrange your flights and your accommodation.

FLIGHTS

Your flight is covered 100% travelling from your closest airport to Dulles (IAD) or Washington (DCA), travelling in economy.

If you are unable to travel safely on your own for medical reasons, we will consider paying for one companion. *Any additional family members or companions must travel at their own expense.*

ACCOMMODATIONS

Your accommodation is covered 100%. Plus, we will provide you a per diem for meals. Any other incidental charges are your responsibility.

If you are travelling with a companion at the expense of Prosthetic Care Facility, we expect that the companion shares your room.

NO PROSTHETIC ISSUE CANNOT BE SOLVED

John Hattingh CP, LPO, CPO(SA) is an educator and leader in prosthetics. His attitude towards his patient is *"No prosthetic issue cannot be solved."*

As the clinician of Prosthetic Care Facility, John Hattingh utilizes his engineering background and years of prosthetic experience to take his patients to the highest level of function and mobility possible. He is always looking for the best methods and technology to help his patients.

John Hattingh is certified in microprocessor knees, bionic feet, and myoelectrics for upper extremity amputees. Specialties include transfemoral socket design, silicone suspension systems, Paralympic athletes' prosthetic design, Targeted Muscle Reinnervation (TMR), hip disarticulation and rotationplasty.

His high success rate in helping his patients achieve mobility and function is attributed to the fact that he harnesses his experience and knowledge with his patients' motivation to be pain free.

WHO WE ARE

Prosthetic Care Facility of Virginia is a full-service clinical practice providing prostheses for lower- and upper-limb amputees of all ages and abilities as well as congenital defects including PFFD, Amelia, and phocomelia. The practice provides state-of-the-art technology for customized fittings of body-powered and bionic prostheses, and includes a gait analysis lab to measure patient performance.

Prosthetic Care Facility of Virginia has received accreditation from the American Board for Certification in Orthotics, Prosthetics and Pedorthics, Inc. (ABC), an independent, not-for-profit organization. ABC accreditation for both practitioners and facilities is the most highly regarded achievement and represents attaining the most stringent level of standards in the field of orthotics and prosthetics.

ABC's evaluation of the Prosthetic Care Facility of Virginia included a thorough review of the physical facility and the quality of patient care. ABC interviewed both staff and patients and conducted a review of organizational documents, including records of patient care.

“Prosthetics is not meant to be inhibitive or painful.”

Industry leader John Hattingh brings more than three decades of patient care to his practice. He previously managed his company Northwest Prosthetic and Orthotic Clinic in Seattle, Washington for 20 years before taking a sabbatical in his native South Africa, and then relocating to Virginia.

A member of the National Rehabilitation Association and American Orthotic & Prosthetic Association, John Hattingh is accredited by the American Board for Certification in Orthotics, Prosthetics and Pedorthics, Inc.
